

Energy Policy

The aim of our energy management system is to enhance the energy consumption in our pellet plants and thereby reduce our environmental impacts.

Our energy policy is based on the following principles:

- We comply with legal and other applicable requirements regarding efficient use and consumption of energy;
- We continuously monitor our process parameters to ensure optimal energy consumption and productivity;
- We account for improving our energy performance in long-term planning;
- We continuously improve our energy performance and energy management system;
- We support the purchase of energy efficient products and services that affect energy performance;
- We ensure the resources and information needed to achieve our goals and to fulfil our energy targets.

Based on our energy policy, we have established energy efficiency indicators and developed action plans.
